

November 17, 2022

To Whom It May Concern:

SCS Global Services is currently in the process of completing two Environmental Product Declarations (EPD) for LOTTE and its Radianz and Staron solid surface products.

SCS is an ISO 14025 Program Operator and the LCA and EPDs are being prepared following the NSF Product Category Rule for Residential Countertops. The EPDs will be externally verified, providing assurance of their credibility and accuracy as well as conformance to applicable international standards (ISO 14025, ISO 14044, ISO 21930:2007).

Based on current estimates, the completion date of the EPD is expected to be *March 31, 2023*.

The forthcoming EPDs for Staron and Radianz will be available for download from the SCS website upon completion of verification: <http://www.scsglobalservices.com/certified-green-products-guide>.

Sincerely,
