

ETTLIN LUX[®]

MADE FOR UNIQUE PROJECTS

“As a manufacturing company, we are dependent on energy. Reason enough for us to use it in a resource-saving way. This can be seen in the use and generation of renewable energies such as hydropower and solar power on our company premises and in our business parks. This systematic energy management system has been certified according to the ISO 50001 standard. We want to continue to live up to our pioneering role in the future, which we play through solid financing and willingness to invest. For us, this means opening up new opportunities for people.”

ETTLIN History

Founded in 1836, ETTLIN[®] Aktiengesellschaft recognized as early as the 90s that the location of its production facilities in Ettlingen and Berlin was particularly suitable for an industrial park. Planned as a complete complex, the combination of living and working was already in the foreground at that time and was implemented accordingly. Find out more about [ETTLIN](#) and their [Ecovadis Sustainability Rating](#).

Technical Textiles Made in Germany

“For more than 185 years, we have stood for innovative technical textiles and the highest quality. The development and manufacturing of our products take place in the company’s own industrial park in Ettlingen”. Other divisions of the ETTLIN Group: ETTLIN Smart Materials and ETTLIN Real Estate.
