

# Care & Maintenance

## General Cleaning

General cleaning can be done with warm water and a few drops of good quality detergent and a soft sponge. (Use good quality dish washing liquid)

Dry the panels with a clean, moistened shammy leather.

Sponge and shammy leather should only be used for cleaning acrylics and should be well rinsed before use to remove contaminants.

## Dust Build Up

Avoid wiping dust off the panels when dry. Instead, use a virgin soft paper towel with soap and water or a neutral glass cleaner.

## Polishing

Polishing helps maintain the beauty of your Acrylic Couture panels. Many polishes contain sealing and dirt-resistant ingredients and can be used regularly.

Spot cleaning can also be done with dedicated acrylic cleaning products such as; [novus-glass-australia.myshopify.com](http://novus-glass-australia.myshopify.com)
