A JOURNEY THROUGH SUSTAINABLE NATURAL WORLDS
FOR HEALTHY INTERIOR DESIGN

ORGANOb

Organoid®
surfaces are
hypoallergenic
and suitable
for those with
allergies.

Connected to Nature

We love nature – that's why we bring it indoors in the form of **unique, sustainable wallpapers and decors**. But that's not all: we also actively protect it by processing **rapidly renewable raw materials, carbon-neutral and regionally**.

Our Vision

As humans, we long for a sense of **relaxation and well-being** – whether at home, at work or in our leisure time. On average, we spend over 90% of our everyday lives indoors – far away from **nature**. This is precisely why our surroundings are so important. Organoid® connects what belongs together: **people and nature**.

Produced in Tyrol

We protect what we love and **care about nature** – that's why we are 100% carbon-neutral and produce locally and sustainably. We process **rapidly renewable raw materials**, recycle waste products and ensure the shortest possible transport routes. We care about people and take the extra steps to ensure a **positive impact** on everyone involved in the finished surface.

Design meets Functionality

Organoid® surfaces are unique indoor nature experiences. They can be used on walls, wood, glass and for many more applications. They ensure a **pleasant indoor climate**, they are sustainable and free from allergens. The natural surfaces create a **great atmosphere**, as well as giving you a **good feeling all-around**.

ORGANOID®

Pure Sensual Delights

Organoid® surfaces are unique due to their **naturalness and authenticity**. The surfaces are untreated and therefore retain all their properties: their **look, smell and feel**. The Organoid® materials make it possible to **experience and enjoy** the finest raw materials **with all your senses**.

See

The first impression – we **SEE** the natural surface that catches our attention and recognise the processed flowers and plants. This awakens our **memories** and reminds us of nature and its effects. Thanks to our **gentle production process**, the **properties of the natural materials** are largely retained.

Feel

Our curiosity is awakened – we touch the surface, **FEEL** the subtle nuances and feel the individual leaves, stems, buds and shells. The Organoid® materials remain **natural and unsealed** to ensure that the fibres of the plants can still be felt.

Smell

For a moment, we just take a break and breathe – we perceive the delicate **scent** of the plants. We **SMELL** the surface and close our eyes: fresh alpine hay, lovely rose, refreshing herbs and energising coffee awaken our emotions. Depending on the raw material used, Organoid® decors have a natural scent and enhance a **healthy indoor climate** – **without any added or artificial fragrances**.

WATCH VIDEO NOW:
FROM MOUNTAINS TO WALLS

ORGANOD

The power of memory and scent

Pleasant scents can have a positive impact on our minds and bodies. **Emotions and memories** are evoked in an instant. This has demonstrable effects on our behaviour: A pleasantly scented environment increases the **duration of the stay of guests by 16%** and **spontaneous purchases** by customers increase by as much as **25%**.

Organoid® Pure Feelings

Organoid® stands for the love of nature and people – which is why we work following a very important principle: creating added value.

With Organoid® wallpapers and decors, you combine **unique designs** with real added value. The natural, sustainable materials ensure an **unrivalled experience** in the interior and create a good feeling all along the line.

Innovative . Creative . Aesthetic

Dive into the many **worlds of nature**. Discover the **unique** Organoid® Collection with sustainable materials for **modern furniture making** and **future-oriented interior design**.

The Organoid® Collection

Embark on a journey! You will find six chapters in the **collection** that will transport you into **different natural worlds**: from the charm of the Tyrolean mountains to Mediterranean delights and the delicate luxury of skeletonised rubber tree leaves. **Thematically grouped sensory experiences** await you, offering you a wonderful first taste of the Organoid® experience. On the back of the surfaces, you will find all the relevant **information** about the product and its effects.

Added value & effect

A natural environment gives us humans a boost and ensures **mental clarity**. Organoid® provides this experience of nature for the interior: the surfaces appeal to the **senses** and ensure **all-around well-being**. Regional, **upcycled and rapidly renewable raw materials** are used to create sustainable products that offer real added value. Each of our compositions has its individual effect on **spaces and people**.

ORGANOID®

Natural flax fleece

Our **natural flax fleece** serves as the backing material for the majority of the collection. And for good reason: flax is a **natural fibre** with a wonderfully low **ecological footprint** and a fantastic effect on the **indoor climate**. The flax fleece is produced entirely without chemicals using hydroentanglement. The material is **breathable, permeable, allergy-tested and regulates the indoor climate**.

Organoid® Collection

Explore and dive in! This collection gives you a taste of the wonderful natural worlds of Organoid®. Browse through the chapters and experience the themed worlds of the collection.

Alpine Paradise

Experience the clarity and freshness of the Tyrolean mountains: real mountain hay from the Alps and colourful flowers offer you wonderfully memorable sensory experiences.

Airy heights

Arrive at the top: Loosely scattered natural fibres on multifunctional backings support a pleasant indoor climate and ensure a sense of well-being.

Forest Bathing

Dive in: immerse yourself in the forest. Experience the healing effect of a walk in the woods and the wonderful properties of refreshing moss for thoughtful space concepts.

Divine Sunshine

Mediterranean sensory joys: Soothing and fragrant herbs from the Mediterranean bring the sunshine to you.

Euphoric Moments

Nature's treasures: Vibrant colours and wonderful fragrances, combined with fantastic design. This is maximalism, interpreted in a new and natural way.

Brilliant Harmonies

Unique elegance and delicate luxury: Exquisite compositions of delicate natural materials and shimmering colours create a dreamlike atmosphere in the interior.

ROSY EVERLASTING
Grey sheep's wool with delicate pink Rhodanthe flowers

JUNGLE KING
Olive-green leaves of the elephant ear plant

TROPICAL HEART
Caladium leaves in various sizes

VIOLETTE
Flower mix from hydrangeas, delphinium, cosmos flowers and baby's breath

SUPERBLOOM
Colourful blend of dyed hydrangeas, daisies and more

COLOUR SPLASH
Colourfully dyed leaves of wormwood and silver ragwort

New arrivals

BRING NATURE IN

Inspired by the fascinating colours and textures of nature, the new Organoid® surfaces bring **vibrancy** and **character** into any interior. From the vivid floral burst of **SUPERBLOOM**, to the tropical elegance of **JUNGLE KING**, and the delicate poetry of **ROSY EVERLASTING** – each surface tells its own unique story, transforming spaces into immersive nature experiences.

Alpine Paradise

THE CLARITY AND FRESHNESS OF THE TYROLEAN MOUNTAINS

The mountains are calling – and you must go. Wonderfully clear, fresh air and **spectacular natural landscapes** await you there. The plants change depending on the season, the altitude and the regions of the Alps. Our wonderfully natural surfaces are made from pure **mountain hay**, harvested from the **Tyrolean Alps**, bringing this biodiversity directly into your interior.

A fresh **hay fragrance** that relaxes the mind and provides **inner peace and clarity** through its unique blend of natural aromas awaits you. And you are also doing something good for our environment. Our Alpine hay comes directly from the regional mountain meadows of Tyrol, just a stone's throw away from our production facilities. This keeps transport routes very short – in line with **real, lived sustainability**.

Airy Heights

ARRIVE AT THE TOP

You are now at higher altitudes – at the very top of the Alps. The vegetation becomes sparser and the flora defies extreme climatic conditions on barren rock. And yet, there is a blade of grass here, a fragrant flower there... With our cosy and sustainable surfaces you can bring this feeling of airy heights indoors.

Forest Bathing

DIVE INTO THE LUSH GREENERY

You immerse yourself in the lush green of the forest. The woody scent of trees envelops you. You slowly walk over soft moss, lightly touching grasses and ferns. Your senses relax and you feel at ease.

The term „forest bathing“ originated in Japan and describes the conscious enjoyment of the healing effects that the forest provides. You can experience that in your home with Organoid®: The surfaces made with real natural materials from the forest transport you directly into wonderfully green plant worlds and their natural properties create a healthy atmosphere in your spaces. Create your forest oasis with wonderful shades of green, relaxing fragrances and a positive effect on the indoor climate.

Naturally sustainable

Real, lived sustainability is always a priority at Organoid®. From the selection of raw materials and the local production to the finished natural product: we follow strict criteria. Because we want to ensure that the surfaces have a positive effect – both on us humans as well as on our environment.

ORGANOID®

Going Further

Our innovative surfaces are natural products – and therefore in themselves a more sustainable alternative to conventional surfaces. But we go further: we produce locally, certified carbon-neutral and in compliance with the principle of the circular economy. We live sustainability in all areas: we work as paper-free as possible, our vehicle fleet has been fully electric since 2022, our production facilities are heated using our own process heat and 100% of our electricity comes from green energy.

Great Choice

Saving our resources is important to us – after all, there is no Planet B. We leave nothing to chance when it comes to selecting our natural raw materials. We work in direct trade with farmers from the Tyrolean Alps, keeping the majority of transport routes extremely short. We give leftover products such as moss and lavender stems a second chance by processing them into wonderfully natural surfaces.

Certified & Award-Winning

We understand sustainability and implement it in a certified manner. Together with ClimatePartner, we assess and reduce our CO₂ footprint and support climate protection projects. We received the Green Product Award in 2019 for our innovative products and their environmentally friendly production, and were nominated for the German Sustainability Award in 2023. But that's not all: as part of the Bioeconomy Austria network, we are constantly researching even more environmentally friendly production methods for a greener future.

Contribution to the preservation of the inner-alpine highland meadows.

Knowledge & FAQ

How to process Organoid® natural surfaces?

- **Wallpaper:** Apply using the wall-pasting technique with overlap and double-cut. The wall must be prepared accordingly. Consult our recommendations for adhesives. The effect of the wallpaper must be assessed after applying 3 strips.
- **Wood-working:** Process using the usual machinery of a carpenter. Protect the material with separating paper and do not exceed the maximum pressing temperature. The use of a counter-balance sheet is recommended.
- **Self-adhesive:** Adhere directly to smooth and rough surfaces using the dry application method. The surfaces must be prepared accordingly.

How long do Organoid® surfaces remain fragrant?

Organoid® natural surfaces have a **natural scent** – without any artificial additives. The intensity of the fragrance depends on **environmental factors**, individual perception and the natural fibres used. Carefully spraying the surface with water can refresh the fragrance, while sealing or varnishing can reduce the intensity of the fragrance.

Can Organoid® natural surfaces trigger allergies?

The tested Organoid® natural surfaces are **hypoallergenic** due to the pressing temperature and pressing time. This means that everyone can enjoy the calming effect of fragrant natural materials without hesitation. The **test report** is available on the website in the download area.

How should Organoid® natural surfaces be cleaned?

The surfaces made of genuine natural fibres are largely **care and maintenance-free**. If cleaning is necessary, we recommend gentle vacuuming or wiping with a damp or dry cloth, depending on the surface. Avoid coarse brushes and aggressive cleaning agents. Please also refer to our specific instructions.

Are Organoid® natural surfaces suitable for wet areas?

The surfaces are **untreated and ,pure nature'**. Without further sealing, they are only suitable for **interior** applications and should be kept away from moisture or wet areas. Our surfaces can be sealed with oils or protected with glass and epoxy to fulfil particularly high requirements for abrasion, water and scratch resistance or lightfastness. Please also refer to our specific instructions.

Are customised Organoid® product solutions possible?

For special requirements and projects, we develop together with you your **customised Organoid® natural surface**. Various parameters can be defined: Colour, fibres, application thickness and backing material. Raw materials provided by our customers, such as waste products from production, can also be processed into unique surfaces. **Interested?** The Organoid® team will be happy to advise you.
